

Scope Document

Professional Clinic & Coaching Website

Scope Document: Professional Clinic & Coaching Website

Domain: neurogenetics.my

1. Objective

To design and develop a premium, conversion-optimized digital presence for holistic healing, functional medicine, and career counseling. The website will establish the practice as an undisputed authority in the Integrated Mind-Brain-Body Healing model, systematically educating visitors and funneling them towards booking high-value consultations or purchasing wellness products.

Procurement: Includes the configuration of the already procured neurogenetics.my domain, along with the setup of scalable cloud hosting and the execution of SSL certificates for secure browsing.

2. Scope of Work

The project entails creating a modern, high-performance website that distills complex medical and psychological therapies (QEEG, Photobiomodulation, Dermatoglyphics) into accessible, compelling value propositions. It will employ a robust UI/UX strategy to guide user journeys from initial discovery to successful booking or purchase.

2.1 In-Scope Features (Phase 1: MVP)

- **Brand Identity & UI/UX Strategy:**
 - Implementing visual brand guidelines that map to the clinical practice's core identity ("The Visionary Mentor" archetype).
 - Crafting specific color palettes, modern typography, and an empathetic, authoritative copywriting tone to build immediate trust.
- **Conversion-Driven Information Architecture:**

- **Home Page:** High-impact hero section, engaging introduction to the Mind-Brain-Body triad, clear service funnels, and social proof/testimonials.
- **About Page:** Deep-dive into the practitioner's background, philosophy (Gut-Brain Axis), mission, and values.
- **Services Pages (Detailed & SEO Structured):**
 - *Mind:* Psychotherapy, Clinical Hypnotherapy, Trauma Recovery.
 - *Brain:* Neurotherapy, QEEG Brain Scans, Photobiomodulation (PBM).
 - *Body:* Functional Medicine, Nutrition, Microbiome Health, Hair Tissue Analysis.
 - *Career:* DMIT, Psychometric Assessments, Leadership Counseling.
- **Lead Generation & Booking Engine:** A structured, secure intake form for lead capture, discovery calls, and appointment requests.
- **Technical Foundations:** Fully responsive design across all mobile and desktop devices, optimized page speed, and strict adherence to modern web standards.

3. Indicative Phases of Development

Phase 1: Core Informational Site & Lead Generation (MVP)

- **Focus:** Establishing a powerful digital footprint, articulating the value proposition, and capturing warm leads.
- **Activities:** Complete UI/UX design, rich content layout based on provided psychological and medical frameworks, configuration of secure contact forms, and comprehensive on-page SEO setup.
- **Timeline:** 4-5 Weeks

Phase 2: Robust E-Commerce Integration

- **Focus:** Transitioning the site into a direct revenue generation platform for physical products (e.g., Light Therapy devices) and digital assessments.
- **Activities:** Setup of an enterprise-grade product catalog, secure shopping cart architecture, and integration of global payment gateways. Note: to

manage costs and complexity, this will strongly leverage open-source or managed solutions such as WooCommerce or Shopify integrations.

- **Timeline:** 4-6 Weeks

Phase 3: Client Portal & Secure Content Hub

- **Focus:** Fostering community, client retention, and delivering sensitive reports securely.
- **Activities:** Addition of a dynamic blog/vlog section for ongoing education, and a dedicated, secure client portal for users to log in and retrieve their QEEG or DMIT reports.
- **Timeline:** 4-5 Weeks (Future Roadmap)

4. Out of Scope

- **DNA Astrology Processing:** The astrological calculation engine is a distinct, proprietary application. This clinical website will only cross-link or describe the astrology service for marketing purposes.
- **Automated Calendar Sync:** Real-time, two-way synchronizations with external personal calendars (e.g., Google Calendar, Calendly) are deferred to focus on manual curation of the schedule in Phase 1.
- **Content Generation:** While layout, SEO structure, and wireframing are provided by the agency, the final specialized medical text, copywriting, and high-production videos must be supplied or approved by the client to ensure clinical accuracy.

5. Assumptions

- **E-Commerce Strategy:** The timeline assumes the use of established platforms like WooCommerce or Shopify. High-complexity custom eCommerce builds would require re-estimation.
- **Content Readiness:** The client will provide final, high-resolution product images, pricing strategies, and thoroughly verify all medical/therapeutic claims before launch.
- **Separation of Concerns:** This domain `neurogenetics.my` is strictly purposed for marketing, e-commerce, and appointment booking.
